

AI Security for End Users

Confident AI adoption without losing control

| Product Datasheet

[Book a time →](#)

The challenge: AI moves faster than governance

Employees adopt AI tools that security cannot see, and sensitive data flows into them. Discover shadow AI, understand AI risk, and enforce policy on prompts, responses, uploads and agent actions.

Discover, assess,
govern, enforce

Shadow AI
discovery

Risk scoring in
context

Block and redact
controls

1. AI app and agent discovery

- Inventory sanctioned and unsanctioned AI tools, copilots, models and agents.

● Shadow AI discovery

● Agent and MCP profiling

● Usage-to-user mapping

2. Prompt & response inspection

- Analyze the intent of prompts, responses and actions beyond simple keywords.

● Intent analysis

● Risk scoring in context

● GDPR, NIST, OWASP, EU AI Act mapping

3. Real-time guardrails

- Block or redact sensitive data and redirect users toward approved tools.

● Block and redact controls

● Approved-tool redirection

● Real-time policy enforcement

Confident AI adoption without losing control

Discover shadow AI, understand AI risk, and enforce policy on prompts, responses, uploads and agent actions.

Capability area	Includes
AI app and agent discovery Inventory sanctioned and unsanctioned AI tools, copilots, models and agents.	Shadow AI discovery
	Agent and MCP profiling
	Usage-to-user mapping
Prompt & response inspection Analyze the intent of prompts, responses and actions beyond simple keywords.	Intent analysis
	Risk scoring in context
	GDPR, NIST, OWASP, EU AI Act mapping
Real-time guardrails Block or redact sensitive data and redirect users toward approved tools.	Block and redact controls
	Approved-tool redirection
	Real-time policy enforcement

THE CHALLENGE

Shadow AI

- ✓ Unsanctioned tools, models, copilots and agents operate outside policy.

Data leakage

- ✓ Users paste confidential data into prompts and uploads.

Unknown risk

- ✓ AI usage is not connected to business impact or regulation.

Part of one platform

AI Security for End Users runs alongside the rest of the SecureTrust Cyber platform, with one console and one policy engine.

Firewall-as-a-Service

Intrusion Prevention System

DNS Security

Secure Web Gateway

Universal Zero Trust Network
Access

Cloud Access Security Broker

Data Loss Prevention

SIEM Platform

Managed Patch Management

Common questions

Does it block legitimate AI use?

No. It redacts or redirects sensitive actions while allowing approved work to continue.

What frameworks does it align to?

GDPR, NIST, OWASP and the EU AI Act.

Talk to an Expert

See how AI Security for End Users fits your environment in a 30-minute conversation with a security expert.
