

SECURETRUST CYBER

Secure Web Gateway (SWG)

Filter the web. Protect every user.

Control web access from the cloud, block malicious destinations and enforce one consistent policy across users, devices and locations.

— The challenge: The web is the riskiest surface

Users browse from anywhere, on any device, and every click is a potential compromise.

Web-borne threats

Malicious, compromised and phishing sites load before anyone notices.

Inconsistent policy

Office, remote and mobile users each get different, weaker controls.

No visibility

Without event logging, you cannot see what users actually accessed.

One web policy, everywhere

- 80+ website categories
- Parked and compromised sites
- Per-user and per-device rules
- TLS inspection
- Always-current blacklist
- Safe Search enforcement
- Custom block and prompt pages
- Searchable event data lake

Part of one platform. Secure Web Gateway runs alongside Firewall-as-a-Service, Intrusion Prevention System, DNS Security, Universal Zero Trust Network Access, Cloud Access Security Broker, Data Loss Prevention, AI Security for End Users, SIEM Platform and Managed Patch Management, with one console and one policy engine.

— Key capabilities

Classify sites, enforce policy and log every event from the cloud.

Malicious-domain blocking

An always-current blacklist blocks phishing, compromised, malicious and parked sites.

80+ website categories

Always-current blacklist

Parked and compromised sites

Flexible policy actions

Choose Allow, Block or Prompt, with Safe Search and content restrictions built in.

Safe Search enforcement

Per-user and per-device rules

Custom block and prompt pages

Encrypted-session inspection

Inspect internet traffic, including encrypted sessions, and log normalized events for review.

TLS inspection

Searchable event data lake

Reporting and audit support

— Common questions

Does it cover remote workers?

Yes. One policy applies consistently across users, devices and locations, including remote work.

Can users request exceptions?

Yes. Custom prompt pages let users request exceptions that IT approves.

Talk to an Expert
